WARRANT FOR THE TOWN MEETING

THE STATE OF NEW HAMPSHIRE

To the Inhabitants of the Town of Boscawen in the County of Merrimack in said State, qualified to vote in Town Affairs:

You are hereby notified to meet at Town Hall in said Boscawen on Tuesday, the sixth day of March, next at ten of the clock in the forenoon, to act upon the following subjects:

The voting on Article 1 will be by official ballot, and the polls shall open for ballotting at ten o'clock in the forenoon and shall not close before six o'clock in the evening. The remaining Articles of the Warrant shall be acted upon at 7:30 o'clock in the evening or at the closing of the polls if the meeting shall vote to keep the polls open to a later hour.

1. To choose all necessary Town Officers for the ensuing year.

2. To raise and appropriate such sums as may be necessary to defray Town charges for the ensuing year, as follows:

 a. Town Officers' Salaries
 b. Town Officers' Expenses
 c. Election & Registration
 d. Exp. Town Hall & Town Bldgs.
 e. Employees' Social Security
 f. Police Department
 g. Fire Department
 h. Care of Trees
 i. Insurance
 j. Planning
 k. Civil Defense
 l. Damages & Legal
 m. Health Officer & Hosp. (Art. 5-6)
 n. Vital Statistics
 o. Sewer Maintenance
 p. Town Dump
 q. Highways & Bridges
 r. Street Lighting
 s. Town Road Aid
 t. Libraries
 u. Town Poor & Old Age Assistance
 v. Memorial Day & Old Home Day
 x. Cemeteries

y. Interest
z. Sidewalks
aa. Payments on Notes and Bonds

and to determine what part or parts of the sums so appropriated shall be funded by the expenditure of amounts in the Revenue Sharing Trust Fund established under the State and Local Fiscal Assistance Act of 1972.

3. To see if the Town will vote to raise and appropriate a sum not exceeding sixty Thousand Dollars ($60,000) for separating storm drains from the sewer system in the Penacook section of the Town and the construction of new storm drains to connect with the State Highway drainage system on Main Street, Forty Thousand Dollars ($40,000) of such amount to be paid from the Revenue Sharing Trust Fund established under the State and Local Fiscal Assistance Act of 1972 and the balance of not exceeding Twenty Thousand Dollars ($20,000) to be raised by taxation in the current year.

4. To authorize the Selectmen to negotiate, exectuve and deliver an amendment to the Agreement between the Town and the City of Concord dated October 17, 1969 providing for the construction, operation and maintenance of a joint sewage treatment and disposal system to serve the Penacook area, so as to reduce each municipality's finance period and payment period provided in Paragraph 2 thereof from twenty (20) years to ten (10) years, such amendment to be in form approved by legal counsel of the Town.

5. To see what sum of money the Town will vote to raise and appropriate for Concord Hospital.

6. To see what sum of money the Town will vote to raise and appropriate for Franklin Hospital.

7. To see what sum of money the Town will vote to raise and appropriate for the use of Rolfe Park.

8. To see if the Town will vote to raise and appropriate a sum not to exceed $1,500. to erect a building on the southeast corner of the Tennis Courts in the Park for restrooms and storage.

9. To see what sum of money the Town will vote to raise and appropriate for the Penacook Youth Center.

10. To see if the Town will vote to empower the Selectmen to borrow such sums of money as may be necessary to meet current expenses of the Town until the taxes are paid to the Treasurer.

11. To see if the Town will vote to give the Selectmen authority to transfer or sell property taken by the Town in default of Redemption from Tax Sale or otherwise acquired.

12. To see if the Town will vote to give the Selectmen authority to transfer any unexpended balance of money from one appropriation to another.

13. To see what sum of money the Town will vote to raise and appropriate for emergency lighting and crash bars to be installed in the Town Hall.

14. To authorize the Selectmen (a) to elect, in behalf of the Town, to have its employees become eligible to participate in the New Hampshire Retirement System pursuant to the provisions of RSA 100-A:20, such election to be in form approved by the Board of Trustees of said System; (b) to bind the Town to make the contributions to said System on account of its participating employees required of an employer thereunder; and (c) to make all those decisions required to be made by the Town as an employer with respect to the participation of its employees in said System.

15. To see if the Town will vote to join the Concord Fire Department Dispatch Center and vote to raise and appropriate the sum of $3,706.00 to purchase the radios necessary.

16. To authorize the establishment of a Capital Reserve Fund for financing the acquisition of a new Fire Truck, and to riase and appropriate the sum of $10,000. to be placed in such fund.

17. To see if the Town will vote to raise and appropriate a sum not to exceed $1,000. to conduct a survey of the Torrent Fire House by an engineer or builder to see what can be done to improve or enlarge this building.

18. To see if the Town will vote to raise and appropriate the sum of $3,100 to purchase a new Police Cruiser in the fall and to keep the old cruiser as a back-up unit.

19. To see if the Town will vote to raise and appropriate a sum not to exceed $7,500. to re-build the old Police Station and to provide it with a septic tank system.

20. To authorize the construction of a new Police Station to be located on the Much-I-Do Fire House lot on the westerly side of Route 4; to raise and appropriate a sum not to exceed $22,000. for the construction of such Police Station; to borrow in the name of the Town by the issue of serial notes or bonds under the provisions of the Municipal Finance Act, as

amended and any other statute thereto enabling a sum not exceeding $22,000. to defray the cost of the foregoing; and to authorize the Selectmen to determine the time and place of payment and rate of interest on such notes or bonds and to do whatever may be necessary or convenient to carry the foregoing into effect, including the execution of builders' and other contracts.

21. To see if the Town will vote to raise and appropriate the sum of $1,200. to purchase a new mowing machine for the Highway Department.

22. To see if the Town will vote to raise and appropriate $500.00 for re-planting trees.

23. To see if the Town will authorize the selectmen to negotiate an agreement with the Water Commissioner for a long term lease to Penacook-Boscawen Water Precinct of a plot of land opposite the Town building on Woodbury Lane. Said Land to be used for a new building and storage area for the Precinct.

24. To see if the Town will raise and appropriate a sum of money to restore rubbish collections. (By Petition)

25. To see if the Town will vote to raise and appropriate funds necessary to fix the following streets – Gage St., Academy St. and Baker St. (By Petition)

26. To see if the Town will vote to accept the streets off Goodhue Road known as Welcome Avenue and Lawrence Street, subject to said roads being paved by the land owners.

27. To see if the Town will accept approximately 700 feet on the Road known as Merrill Corners Road off Lower Water Street. (By Petition)

28. To see if the Town will vote to raise and appropriate a sum not to exceed $1,000. to repair Flanders Pond Dam.

29. To see if the Town will vote to extend the sewer up Queen Street.

30. To request the Regional Refuse Disposal Planning Committee, in conjunction with other towns represented on the Regional Refuse Disposal Planning Board to work out a detailed proposal to resolve the Town's Solid Waste Management problems and to undertake such analysis, negotiations, and determination of costs, as may be necessary to implement the proposed solution and to present these to the Selectmen for action at a Town Meeting;

and to appropriate $948.00 at a rate of 30c per capita as the Town's share of costs of the Regional Refuse Disposal Planning Board, conditional upon the terms set forth in the Board's proposed bylaws.

31. To determine whether the Town of Boscawen, New Hampshire will authorize the extension of the municipal sewer system in Route 3-4, (so-called) from its present authorized terminus in said roadway approximately twenty-five hundred feet (2,500') Northerly to a point in the vicinity of the Welcome property near the intersection of said road with the access road to Interstate 93, in order to serve said property and other adjacent property on the condition that the cost of the extension, including both design and construction, will be borne solely by the owner of the benefitted property or their successor in title. This authorization shall authorize the Selectmen to enter into, in behalf of the Town, any agreements necessary to secure the payment of the cost of the extension by the owner, and to file whatever requests for approval may be necessary with any government agency. (By Petition)

32. To transact any other business which may legally come before this meeting.

Given under our hands and seal, this 16th day of February, in the year of our Lord nineteen hundred and seventy-three.

Roger C. Sanborn
Donald F. Welcome
Selectmen of Boscawen

BOSCAWEN PUBLIC LIBRARY

The library of a good man is one
of his most constant, cheerful,
and instructive companions,
and as it has delighted him in youth
so will it
solace him in old age.
— Dibdin

The Library Trustees held regular meetings during the year.

The columns on the Main building have been repaired, also the locks on the two doors and the leak in the roof.

At the main library, Mrs. Broughton librarian, working in conjunction with the Community Park program for the children held a Summer Reading Contest for them. They were entered in the contest and prizes of books were given them.

We have Bookmobile service four times a year from the New Hampshire State Library. Books are also borrowed from the State Library at the request of its readers and films for the Merrimack County Nursing Home and Jail.

New books were on display at both the Main and Branch library during Book Week.

Both libraries were decorated for the holiday season.

Open house was held at both the Main library and the Boscawen Historical Society on Saturday, May 13. At the library many fine exihibits of arts, crafts and hobbies were displayed by residents of the town and surrounding area. Mrs. Grace Creaser trustee, served as chairman, assisted by Mrs. Beulah Nardini trustee and librarian Mrs. Constance Broughton. The president of the Boscawen Womans Club, Mrs. Marguerite Barber served as chairman of refreshments, assisted by other members of the club.

The Historical Society featured Donald Randall's exhibit on early lighting.

Mrs. Henrietta Kenney served as chairman, assisted by Mrs. Virginia L. Colby. Many people attended.

The Trustees wish to express their thanks and appreciation to the Boscawen Woman's Club and the Historical Society for their cooperation, also to the contributors and all the committees who gave of their time to make this event a success.

There has been a definite increase in the circulation at the Main library in the past year.

Gifts of books have been presented to the Main library by Mrs. Brian Swenson and Mrs. Joseph (Effie Tucker, also the Echoes magazine from the Woodbury family. The Trustee's gratefully acknowledge these gifts.

At present the Branch library will be open only on Wednesday afternoon and evening until further notice.

Circulation was as follows,

Adult fiction	2,672
Juvenile fiction	2,275
Adult non-fiction	505
Juvenile non-fiction	347
Magazines and records	1,076
Total	6,875
Main Library	5,052
Branch	1,823

REPORT OF FIRE CHIEF

The Boscawen Fire Department has had a total of 82 calls, 4 Mutual Aid calls, 1 still and 4 false.

The Department has had training on ACTUAL STRUCTURAL fire fighting; a thirty hour Course on Basic Fire Fighting Techniques; the Officers took part in a 32-hour week-end, "Fire Officers' Seminar" held in Laconia. N.H.

All this training was supervised by the State of New Hampshire Fire Service Training, by Certified New Hampshire Fire Instructors.

The 1969 750 gallons per minute pumper for Torrent Engine Co. is considered to be in good condition, but the 1951 500 gpm pumper for Much-I-Do Co. has reached the age and condition where early replacement should be considered. Salvage, emergency, and minor gear are lacking on both trucks. The loaded hose is adequate; however, spare shifts in each company are lacking.

(The above paragraph is taken from the report of the Insurance Services Office of New Hampshire, to the Town of Boscawen, in 1972.)

Roland W. Bartlett
Fire Chief

REPORT OF THE FOREST FIRE WARDEN AND DISTRICT CHIEF

In New Hampshire, forest fire control is a cooperative State-town program. The Town Forest Fire Warden, appointed by the Director, Division of Resources Development upon recommendation of the Selectmen and the State's District Forest Fire Chief is responsible for fire suppression and other related duties. The State shares equally with the town in the cost of most forest fires, except illegal and careless fires, which are charged to the responsible party. The State further provides fire detection services, prevention programs, fire training for town wardens and crews, and back up equipment for fire suppression.

By authority of the State, the Town Forest Fire Warden controls all outside burning in his town except backyard cooking fires. Any person wishing to kindle a fire when the ground is not covered with snow must obtain a fire permit, free of cost, from the Town Forest Fire Warden. No permits will be issued for fires between 9:00 A.M. and 5:00 P.M. unless it is raining, except for commercial purposes.

Please be careful when using fire, remember it can be an extremely useful tool when under control but once allowed to run wild it can become a disastrous and devasting force. Only you can prevent a forest fire.

Number of fires reported and acres burned – 1972 season:

STATE – 410 fires	361 acres burned
DISTRICT – 90	13½ acres burned

DISTRICT CHIEF
Robert J. Burton

FOREST FIRE WARDEN
Arthur E. Bartlett

REPORT OF THE REGIONAL REFUSE DISPOSAL PLANNING COMMITTEE

The Advisory Committee authorized at the last Town Meeting and appointed by the Moderator has met with the Central N.H. Regional Planning Commission through the summer and fall, reviewed technical studies on various means of waste disposal; reviewed State air pollution control requirements; and evaluated alternate plans to help Boscawen upgrade our solid waste disposal practices.

We have concluded that:

A. our present dump operation must be upgraded to meet State requirements by July 1, 1974;

B. that a sanitary landfill procedure offers the best method of disposal at least cost for the foreseeable future; that the number of potential sites, however, is limited and require detailed analysis and community discussion before they can be recommended as acceptable;

C. that there appears to be significant savings of towns can work toward a joint solution, but that exact costs cannot be determined until further studies are completed;

D. that there is significant interest in at least eleven other municipalities in working toward joint resolution of the problem. This is evidenced by the agreement and action of the towns to form a Regional Refuse Disposal Planning Board as provided under State law.

It is recommended that the Town take the following action at the 1973 Town Meeting: 1. Direct the Committee in conjunction with other towns represented on the Regional Refuse Disposal Planning Board to:

A. work out a detailed proposal to resolve the Town's solid waste management problems or to report why such a joint action is not advisable, and

B. undertake such analysis, negotiations, and determination of costs for initial and continuing operations, and to draft the proper legal documents and organization procedures necessary to implement the proposed solution and to present these to the Selectmen for action at a Town Meeting.

2. Appropriate $948.00 at a rate of thirty cents per capita as the Town's share of costs of the Regional Refuse Disposal Planning Board to undertake its work, conditional upon the terms set forth in the Board's proposed bylaws.

Respectfully submitted,

Fred Supry
Harvey Hollins
James Steenbeke, Sr.

WARRANT FOR ANNUAL MEETING OF PENACOOK-BOSCAWEN WATER PRECINCT

To the inhabitants of Penacook-Boscawen Water Precinct in the county of Merrimack and State of New Hampshire, qualified to vote in Precinct affairs.

You are hereby notified to meet at the Boscawen Town Hall in Boscawen in said Precinct on the 23rd day of March 1973, at 7:30 o'clock in the evening, to act upon the following subjects:

1. To hear the reports of the Precinct officers and pass any vote relating thereto.

2. To choose all necessary Precinct officers for the ensuing year.

3. To authorize the Precinct Commissioners to borrow money in anticipation of Precinct Taxes and other revenues for the year and to issue notes therefor at such time within one year and at such place as the Precinct Commissioners shall determine.

4. To see if the Precinct will vote to raise and appropriate the amounts listed in the budget for 1973.

5. To see if the Precinct will vote to give the Commissioners authority to transfer any unexpended balance of money from one appropriation to another.

6. To see if the Precinct will vote to authorize the Commissioners to use the $3,927.60, being held by Trustee of Trust Funds, and some of the money in the Budget Item "Capital out-lay, New Construction," to build a building near the Town Shed.

7. To transact any other business which may legally come before the meeting.

Given under our hands and seal this 6th day of February, 1973.

Russell C. Mattice
Francis H. Grant
James D. Holden
Precinct Commissioners

A true copy of Warrant – Attest:

Francis H. Grant
James D. Holden

COMMISSIONER'S REPORT 1972

In 1972 we laid 600 feet of 6 inch main and 1 hydrant in Pine Street replacing a small plastic line.

We also laid approximately 2,313 feet of 8 inch pipe in Marlborough Road.

We completed the land swap with Robert Robillard on the Webster shore which gives us about 550 feet of frontage on Walker Pond.

In last year's warrant under Article 6 we were authorized to purchase land from the town of Webster for $300.00 with $500.00 added for a survey. After contacting four surveyors we were unable to complete the survey before the snow came. We have a man now who says he will be able to do the job as soon as weather permits.

In July of last year we went over some of our land in Webster and when we came to the Whitney lot, so called, we thought this lot should be cut. Then we talked of reforesting if there was any federal or state money available.

On July 14, 1972 Mr. Mattice and Mr. Grant went to 3 different agencies in Concord to look into the prospect of aid to reforest. Each time we were referred to the County forester. Unfortunately he was out of town and would not be back until the following week. Each agency we talked to did not know of any money available so we never got back to the County forester.

We then proceeded to have the lot cut. So we contacted Mr. Bailey and he went over the lot and offered us $20.00 per thousand. We gave him the job and told him to proceed with the cutting.

Now it seems that one person took exception to our cutting this lot and instead of coming before the board with his gripes, he must have contacted every agency in the state short of the Federal Government. And from there he went to the newspapers.

On August 10, 1972, we went with Mr. John Conde and Mr. John Sargent, County & State foresters, they recommended that we cut no more because as of now there is no violations of the timber harvesting laws of the State. They also recommended we sow a fast growing grass seed in the log yard and skid trails which we have done. They said the type of lumber we cut was selling between $16.00 and $21.00 per thousand at that time we got $20.00 per. Lot size was about 12 to 15 acres. We received $2,927.60 for lumber.

As many of you know we have lost the use of the old fire station where we kept our small tools, stock and truck. The town has outgrown their building where we do have room to keep our backhoe for this winter. So we are asking permission to use the money we got for the old barn on Swett St. and the money we got from the timber sale toward putting up a new building opposite the town garage. We will be asking the Selectmen for a long term lease on the land.

We are thinking in terms of 50' x 36' in a steel type building. We have never had a suitable building for our supplies and equipment. We think this building will be of ample size for years to come with room for a meter repair area when the time comes.

Our water consumption is climbing all the time, this year we added 39 new services.

The following yearly figures give you an idea how fast we are growing.

Gallons pumped

1969 – 164,537,000 (1st full year)
1970 – 177,778,150
1971 – 219,947,300
1972 – 229,617,100

We have had several days where we reached more than 885,000 gallons. So you see we are approaching 1 million gallons a day. We think we are in pretty good shape with the exception of storage. Therefore we will be presenting to the voters this summer a bond issue for a 1 million gallon storage tank adjacent to our present tank on Queen Street.

We have conferred with our engineers Coffin & Richardson about this and they are to submit preliminary plans in the future as to the cost and so on.

The following are copies of a letter from the State Water Supply and Pollution Control Commission which we did not bring to your attention at March 1972 meeting because we knew the regional planner, Mr. David Rogers was working on his plan which we did not receive until August 29, 1972. It was this plan which stopped us from presenting more storage capacity at our last annual meeting. We advise reading these reports thoroughly so you can be fully aware of what they contain for the future.

TO: All Water Works Superintendents

RE: Water Supply & Pollution Control
Commission – Surface Water Supply Policy –
Adopted September 8, 1971

Enclosed is a copy of a memorandum upon which the Commission has based a recent policy decision regarding treatment of all surface water supplies. The policy of the Commission is to be found in the three numbered paragraphs on page 3.

This letter is to advise all those using surface water supplies of the program which will be undertaken in the future. It is hoped that through this program, which will be spelled out in more detail at a later date, all users of public water supplies within the state will be provided with water of completely acceptable quality in all communities and at all times.

This office will, of course, work closely with the utilities involved in seeking the most economical and satisfactory solution to the problems which face many communities. Time schedules and means of implementing the program have yet to be determined, however, in the meantime we would welcome any questions or comments that you may have.

Very truly yours,
Daniel Collins, P.E.
Associate Sanitary Engineer

N. H. WATER SUPPLY & POLLUTION CONTROL COMMISSION
Prescott Park, 105 Loudon Road, Concord, N. H. 03301

October 8, 1971

FROM: Daniel Collins, P.E., Associate Sanitary Engineer
SUBJECT: Public Surface Water Supplies
TO: William A. Healy, P.E., Executive Director

The staff has recently reviewed the current status of public water supplies in the State. There are, at present, some 125 public water supplies, both publicly and privately owned. The following table is a summary of the State's public water supplies indicating source and population served by both surface and ground sources.

Public Water Systems	
Surface Supplies	67
Subsurface Supplies	58
	125 – Total Public Water Supplies
Population Served by Public Supplies	525,000
Population Served by Surface Supplies	400,000
Population Served by Subsurface Supplies	125,000
Population Served by Fully Treated Surface Supplies	58,000
Population Served by Partially Treated Surface Supplies (Chlorination Only)	342,000

In the past the remoteness of many surface supplies was considered to be a safeguard to the quality of the source. As public health authorities became aware of the potential hazards of a completely untreated supply, laws requiring simple chlorination of all surface supplies were enacted. This action took place more than 10 years ago. Since that time, with few exceptions, there has been virtually no progress in improvement of surface water quality except for a more intensive program of inspection to insure water of acceptable bacteriological quality. There has been no progress in the upgrading of physical and chemical quality which the public has come to expect and is entitled to.

There are almost no untreated surface supplies that provide water of completely acceptable physical and chemical quality at all times. It is impossible to insure completely satisfactory water quality consistently without extensive treatment.

Of perhaps more importance is the question of viruses and pesticides which present practices of simple and superchlorination only partially remove. Chemical coagulation, sedimentation, filtration and disinfection are the only effective means of treating surface water to a degree consistently meeting the recommended quality standards adopted by the U.S. Public Health Service for bacteriological, physical, chemical, virological and pesticidal quality.

Increased public mobility and a rapidly growing population have now made former inaccessible areas the object of greatly increased residential and recreational use. There are now no surface supply watersheds that are not

accessible to growing numbers of people. Surface waters that previously were virtually unused are now subject to extensive pressures by the public. Increasingly, the public is insisting on the relaxation or elimination of restrictions on recreational uses of supplies. Many water utilities, despite repeated recommendations, have failed to acquire adequate protective ownership of their watershed so they now are powerless to prevent development that will result in lowered water quality and/or health hazards.

Both the New England Water Works Association and the American Water Works Association have issued statements of policy concerning recreational use of water supply impoundments. Both organizations are very specific in recommending prohibition of any recreational use of a water supply impoundment without treatment extending beyond disinfection.

Chapter 148:22 empowers the Commission "to investigate the sanitary conditions and methods pertaining to the source, treatment and distribution of all public water supplies for domestic use and to require the application of any treatment or improvement and methods as it may deem necessary to insure fitness and safety and adequate protection of the public health." It is the opinion of the staff that due to the increased activity in most supply watersheds and the demand by the public for water of such quality as to meet and exceed minimum standards that treatment beyond disinfection is of immediate necessity in a number of surface supplies and of early concern in all surface supplies.

It is therefore, the recommendation of the staff that the Commission adopt the following policies as they pertain to public surface water supplies:

1. That any new or expanded surface water supply source not be approved until such time as full and complete treatment consisting, in general, of chemical coagulation, sedimentation, filtration and disinfection has been provided.
2. That all existing surface water supplies with chlorination as the only means of treatment be required to provide complete treatment as above or abandon the supply and replace it with a suitable ground water supply.
3. That a system of priorities be established to require the ultimate abandonment of all partially treated surface supplies. Early priority shall be given to those supplies which create the greatest potential danger to the public.

Our responsibilites under the law are clear: everything possible must be done to protect the health of those using public water supplies. To insist upon strict standards of treatment for wastewater in the effort to protect and upgrade the surface waters of the state while yet requiring only very marginal treatment of drinking water is not consistent with the Commission's objective of providing full-scale protection of health and well-being of the public.

It is respectfully requested that the Commission adopt the above policies so that our responsibilities in insuring universally acceptable water quality standards can be met.

CENTRAL NEW HAMPSHIRE REGIONAL PLANNING COMMISSION

Boscawen Water Commission
c/o Russell G. Mattice
12 Chandler Street
Penacook, New Hampshire

Dear Mr. Mattice:

The Central New Hampshire Regional Planning Commission is concluding a study of water supply in the Region. Attached is a draft copy which needs your review and comments before it is adopted by the Commission.

If you would mark up this copy and return it before September 20, we will incorporate your views in the final report which is required for towns to receive Federal assistance for water projects.

Thanks for your assistance.

Best Wishes,
David H. Rogers
Planning Director

BOSCAWEN
DESCRIPTION OF THE SYSTEM

History

The Town of Boscawen, as well as the northern end of Penacook, is serviced by the Penacook-Boscawen Water Precinct.

Founded in 1892 as a municipal water system, the precinct is under the authority and operation of a three-man Precinct Water Commission.

Present Water Supply and Storage

Before 1941, a 12-inch wood-stave pipe was used to carry water from the 190-acre Walker Pond to the Penacook-Boscawen distribution system. However, during 1941 a 10-inch cast iron pipe, one mile in length, was constructed under the Works Progress Administration.

New facilities were added in 1951, including a chlorination chamber, and a 500 gpm booster pumping station in order to increase flow into the distribution system. By the end of 1968, more extensive chlorination equipment, a 12-inch main between Walker Pond and the chlorination facilities, and a 750 gpm pump were installed. There still exists an 8-inch pipe crossing the Contoocook River at Crescent Street which is connected with the Concord Municipal Water System.

The gate on the pipe is opened only during emergency conditions on a reciprocal basis, depending upon which system is in need of more water. The Penacook-Boscawen 75-foot 300,000 gallon standpipe, located on Queen Street, can only accept water after its level falls below 40 feet in depth. This is due to elevation balancing factors as related to Concord's storage tank west of Route 3 in the north end of Concord. Fishing and boating are not restricted on Walker Pond; however, swimming is not permitted in the Pond. Frontage land is almost entirely of woods.

Consumption

Total daily consumption for all users in 1970 is estimated to range from .3mgd to .9mgd, with the average being close to .6mgd. Approximately 177,778,150 gallons of water were pumped in 1970. Of the more than 650 connections within the Precinct, only 55 are metered. These 55 meters are for the most part installed on commercial or industrial concerns, such as local dairy farms or apartment houses.

CURRENT SERVICE AREA AND EXPANSION, AND POLICIES FOR EXTENSIONS

An 8-inch main has just been installed and extended to the north end of the Precinct to service the Merrimack County Nursing Home and Hospital, with Merrimack County paying all costs of construction (approximately $27,000), and the Precinct in turn to provide free water to the County for a time period of six years or $12,000 based on present meter rates, whichever comes first. Within the Precinct itself, almost 100 percent of the resident water users are serviced by the municipal system, approximately 2200 people. At a rate of $3,000 annually, for the last three years, the Precinct has voted to acquire as much land adjacent to Walker Pond as possible. To date forty-five acres have been purchased. New installations are made on the basis of demand only, but to date have followed the recommendation of the Town Plan adopted in 1965.

Adequacy of Existing Water Supply and Quality

In 1966 Coffin and Richardson, consulting engineers, completed a thorough examination of the Penacook-Boscawen water system. Major recommendation for the transporting of water from Walker Pond to the distribution system have been constructed in the last several years. These included a new pumping station, 5200 feet of 12-inch transmission lines to the chlorinator. Other recent improvements have included the laying of 4,500 feet of 8-inch pipe service to new development on Goodhue Road and the extension of an 8-inch main to the Merrimack County Home in the northern part of Town.

The present system is finishing up construction and installation of several distribution circuits on Goodhue Road, Raymond Road, and Knowlton Road.

The extension to the County Home of approximately two miles places a great burden on the distribution system because it stimulates land development on the

now largely undeveloped land between Goodhue Road and the County Home and creates extremely long run of piping on the opposite end of the system than the existing storage tank, which was recognized by the engineers report as of inadequate capacity.

The current program of replacing pipes and creating loops in the system should be continued. Policy regarding new demands on the water system off the new extension on Route 3 should be carefully analyzed in light of the limited storage capacity for fire fighting.

The existing storage tank holds 300,000 gallons. With existing consumption estimated at .6mgd adequate storage requires, for consumption and fire protection, new storage approximately twice the existing capacity. Clearly, an extended fire or break in the pipe could seriously impair the reliability of the system to meet fire or consumption demands.

Water Supply

Four engineering and planning firms have estimated future population or patterns of consumption for Boscawen. There were:

Edwards and Kelcey 1964
Coffin and Richardson 1966
Anderson-Nichols, Inc. 1969
Alonzo B. Reed 1970

Listed below are the population estimates for the target years of 1975, 1980, 1990. The last column is a straight line projection based on census change from 1960 to 1970 or a rate of 4.5 percent annually.

Population 1970 – 3162 (actual)	1975	1980	1990
Edwards & Kelcey – 1964	3075	3400	3800
Coffin & Richardson – 1966	2250	2500	2600
Anderson–Nichols – 1969	2700	3100	4000
Alonzo B. Reed – 1970	2878	4250	5133
Central N.H. Regional Planning Comm. – 1971	3872	4584	6007

Based on the known construction activity and extremely underrated growth rate, it is felt the Commission's population projections represent a more accurate reflection of the population the community will have in the benchmark years.

Projected consumption estimates prepared by Anderson-Nichols, Coffin and Richardson, and Alonzo B. Reed, are inadequate. These are listed below. Applying Standard A to the Commission's projection gives consumption figures which reflect the probable demand on the system.

Water Consumption – Million Gallons per Day			
1970 – .6mgd (actual average)	1975	1980	1990
Alonzo B. Reed	.384	.461	.645
Coffin & Richardson	.395	.4	.5
Anderson–Nichols	.6	.7	.8
Central N. H. Regional Planning Comm. (Standard A) % of population served	.46 (80%)	.62 (85%)	.98 (90%)

Discrepancies between current and projected consumption in 1975 can be attributed to the very high industrial usage of water and leaks. It is anticipated that in the future industries will use and recirculate water from the Contoocook River and that major leaks will be found.

Engineers' estimates indicate that the safe yield level of Walker Pond is 2.2mgd. Clearly there is more than enough water to meet Boscawen's needs from their current source of supply, even when these figures are reflected upward to meet maximum daily demand.

Storage

Water storage for the Boscawen system is supplied by the upper few feet of Walker Pond and by the 76-foot, 300,000 standpipe located off Queen Street (elevation 502.6).

Standards for existing storage can be based on the following factors:

Storage for consumption = 25% of maximum daily consumption

Storage for fire protection = based on fire flow established by American Insurance Association

Emergency Storage = 15% of maximum daily flow (Maximum daily flow in Boscawen is estimated at 1.8 times normal flow.)

Fire flows for the Penacook Village area which comprises the highest residential density is 1500gpm for seven hours at 20psi. This is expected to change to 2000gpm for eight hours at 20psi in 1990. Based on these standards, existing as well as projected, storage requirements can be estimated.

	Population		Storage for Normal			Total for	Total Storage for
	Total	% to	Consump-	Storage for	Emer-gency Reserve	Consump-tion & Re-serve	Consump-tion &
Year	Pop.	Service	tion	Fire	Storage	Storage	Fire
1970	3162	70%	.13	.630	.08	.11	.74
1975	3872	80%	.21	.630	.12	.33	.96
1980	4584	85%	.28	.630	.16	.44	1.07
1990	6007	90%	.437	.960	.26	.69	1.65

It is clear that the present storage tank of 300,000-gallon capacity is inadequate to meet fire demand needs and further that the engineers' estimate on the capacity of the 10-inch transmission precluded dependency on Walker Pond as a fire storage source. To meet fire and consumption storage requirements in 1990, the construction of facilities with 1.4mg storage capacity is warranted.

Some areas off Queen Street have experienced pressure problems because of their elevation. Adequate pressure cannot be maintained at elevations greater than 420 feet without booster pumping. Thus location of new storage facilities is of major importance.

Water Quality

Boscawen's water is treated by a Chlorine Gas governed by flow added proportionate to flow. The chlorinating station was built in 1968. At the same time a pump was added at Walker Pond to increase flowage to meet demand. This water treatment facility does not meet the requirements of the Water Supply and Pollution Control Commission adopted in September, 1971, which call for full treatment of all surface water sources.

To meet water quantity and quality standards, the Boscawen water district appears to have several options:

1. increase storage capacity to meet only consumption demands – the addition of .4mg of storage capacity by 1990; or
2. increase storage capacity to meet both fire and consumption demands – the addition of 1.4mg of storage capacity by 1990;
3. addition of new filtration plant to treat present water supply; or
4. abandonment of present water supply and use of deep wells for water supply; or
5. abandonment of present water supply and use of treated water from Concord's filtration plant; or
6. combination of 4 and 5.

Short-Range Program – Boscawen, New Hampshire

A three-step construction program is proposed for the Boscawen water precinct.

Stage 1 – 1973: In order to meet State water quality standards, it is proposed that the Town of Boscawen formalize arrangements with the City of Concord to buy fully-treated water. This arrangement would provide a major alternative to providing full treatment of Walker Pond.[1] Such an arrangement would require building pumping facilities to maintain 100 percent storage in the Queen Street storage tank.

Stage 2 – 1973: As an integral part of the Stage 1 proposal, ground water sources should be located along the Merrimack River southeast of the County Home. Such a well, or well field, should have a minimum capacity of 500gpm. To meet both consumption and emergency reserve needs until 1990,

a .4mg storage tank should be constructed at the 500 foot contour north of Goodhue Road.

State 3 – 1980: Upon review of the cost of water from Concord, the productivity of the proposed Stage 2 well field and current fire rates and growth patterns, the community should consider on the basis of a financial analysis of these costs and other community budget demands, the construction of a one million gallon storage tank in the vicinity of Cornhill Road and Route 3.

Financial Considerations

Stage 1 – 1973: It is assumed that Stage 1 would require a pump and controls to assure that the Queen Street storage tank would be maintained at maximum capacity. This cost is estimated at $15,000. Cost of water cannot be determined until a rate study for the Concord system is complete. It is estimated, however, that Concord would sell water to Boscawen at their cost and prorate maintenance fees.

Stage 2 – 1973: It is estimated that well exploration and the required pumping facilities would cost between $50-$60,000. Water storage costs are estimated at $100,000 for the recommended .4mg storage tank.

Stage 3 – 1980: Cost of developing a one million gallon storage tank is estimated at $250,000.

It is recommended that Stage 1 costs be borne by a user fee and water rates compatible with the cost of buying water from Concord. Stages 2 and 3 costs total $410,000. One-half of this amount should be borne by the Town through general obligation bonds and the remaining amount of $210,000 would be eligible costs under HUD grant programs. Cost of main extensions should be borne by the operating revenues of the precinct.

[1] As a basis for this recommendation, cost figures for water treatment plants listed in Appendix 3 of the Office of State Planning Water Supply Report, Phase II (A-NR) were updated using engineering news record price indices as of September 1971. Plant capacity was figured on the maximum daily flow required to meet 1990 consumption needs (1.7mgd). This equals $425,000. To this is added 35 percent for engineering, contingencies, and interest during construction, bringing the total to $574,000 using current construction costs. Additionally, annual operating and maintenance costs would be required.

AUDITOR'S REPORT

Board of Commissioners
Penacook and Boscawen Water Precinct
Boscawen, New Hampshire

Gentlemen:

We have examined the Balance Sheet of the Penaook and Boscawen Water Precinct as at December 31, 1972 and the related Statements of Income, Changes in Financial Position and the Precinct Tax Collector for the year then ended. Our examination was made in accordance with generally accepted auditing standards, and accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

In our opinion, the accompanying Balance Sheet and related Statements of Income, Changes in Financial Position and the Precinct Tax Collector present fairly the position of the Penacook and Boscawen Water Precinct as at December 31, 1972 and its operations for the year then ended in conformity with general accepted accounting principles applied on a consistent basis.

Respectfully submitted,
JOHN E. RICH & COMPANY
Accountants and Auditors

Abatements	268.32	278.00
	20,743.65	6,869.24
Uncollected Taxes, December 31, 1972		
Precinct Property Taxes	$5,154.33	

* Includes uncollected taxes bought back by town.

** Includes interest on uncollected taxes bought back by town.

NOTE: The accompanying notes are an intergral part of the financial statements.

NOTES TO FINANCIAL STATEMENTS

1. *Summary of Significant Accounting Policies.* The accounts of the Precinct are maintained on the accrual basis of accounting. Inventories are stated at lower of cost (first-in, first-out basis) or market. Property, plant and equipment are recorded at cost. Expenditures for renewals and betterments are capitalized. Expenditures for maintenance and repairs are expensed as incurred, since it is not practicable to determine the amount of, or duration of, future benefit. Depreciation over their estimated useful lives is determined principally on the straight-line method. Although still in use, assets that are fully depreciated are removed from the accounts.

2. The amount of the Trust Fund Account Receivable represents the amount of money transferred to the Trustees resulting from the sale of land, building and timber.
